IDENTIFIERS	Canadian Home Economics Journal; Home Economics Research Journal; Journal of Consumer Studies and Home Economics; Journal of Vocational Home Economics Education

ABSTRACT

This index lists 945 research articles from 4 English-language journals in the field of home economics: the "Canadian Home Economics Journal," volumes 23-30; the "Home Economics Research Journal" (United States), volumes 1-14; the "Journal of Consumer Studies and Home Economics" (United Kingdom), volumes 1-10; and the "Journal of Vocational Home Economics Education" (United States), volumes 1-3. The four parts of the document are a subject index, an author/title index, a keyword-in-title index, and a complete bibliography for the four journals keyed by number to the three indexes. The subject index consists of 12 main categories and 56 subcategories. The 12 main categories of the subject index include art and design; clothing and textiles; communications; consumer studies; family studies; foods and nutrition; higher education in home economics and professional development; historical and philosophical perspectives in home economics; home economics education; home environment and equipment; international cooperation, global concerns, and Third World development; and research issues. Preface

Growth of knowledge in a profession depends on the effectiveness of communication among its members. The primary medium of communication for these professionals is the journal. Facilitating access to relevant journal literature enhances the endeavors of researchers and practitioners professionally and academically.

Applying this rationale to the profession of home economics, the objective of this project was the development of a cumulative index of home economics research literature published in four major English language home economics journals or sections thereof: the *Home Economics Research Journal* (U.S.A.), the *Journal of Consumer Studies and Home Economics* (U.K.), the *Journal of Vocational Home Economics Education* (U.S.A.), and the refereed section of the *Canadian Home Economics Journal*. Because 1972 marked the beginning of the first of the four journals (HERJ) or sections of them devoted solely to home economics research, the index began with articles published in 1972 with coverage up to, and including, 1986. This index provides easy access to the complementary and diverse efforts of researchers in many countries.

The production of a cumulative index may appear to the uninitiated as a straightforward "mechanical" endeavor. To some extent this is true if the index is composed of a keyword-in-title index and an author/title index. However, if a subject index is added, the complexity of the project increases, especially if a comprehensive set of subject headings does not exist. Because of the diversity of topics covered in the four journals and the differences in terminology, it was deemed that a subject index was essential to maximize the benefit derived from a project of this nature.

To begin this index project, the bibliographic data for the 945 articles contained in the four journals were entered into a computer readable file. These data could then be manipulated through the use of computer programs to yield the author and keyword-in-title indexes as well as the complete bibliography. The subject index required a further step – the categorization of the articles.

To subdivide the items in the four journals into meaningful segments for users of the index, 12 broad categories were established. These required subdivisions which resulted in the establishment of 56 subcategories. An article could be assigned to more than one category or subcategory and usually was. In fact, the 945 articles were given 1,823 places in the subject index which means that, on the average, each article had about two categories assigned.

This subject index is only one of the four sections of the *Index to Research in Home Economics*. In addition, the index contains a keyword-in-title index, an author index and a listing of the complete bibliographic details for each of the articles. A user of the cumulative index can identify the literature contained in the four journals through the use of the Subject Index, the Keyword-in-Title Index and the Author/Title Index. Each one of these sections has its unique features for directing the user to the relevant literature on specific topics. The novice user may find the subject index to be of greatest usefulness because familiarity with the literature is limited. The experienced researcher who is familiar with key concepts, terminology and authors, may find the keyword-in-title and author/title indexes to be more effective approaches to the identification of key sources of information.

By combining the bibliographic data from four home economics journals containing significant contributions to the home economics body of knowledge, we believe this cumulative index provides scholars with a research tool which will facilitate wider use of the significant efforts of home economics researchers around the world. That, ultimately, is the goal.

Acknowledgments

This research was supported by a grant from the University of Alberta Support for the Advancement of Scholarship Small Faculties Endowment Fund. The assistance of Marie Slusar in the verification of categorization of articles, Janice Smith in data entry, and Gardner Indexing Service for programming and formatting for typesetting directly from electronic files is gratefully acknowledged.

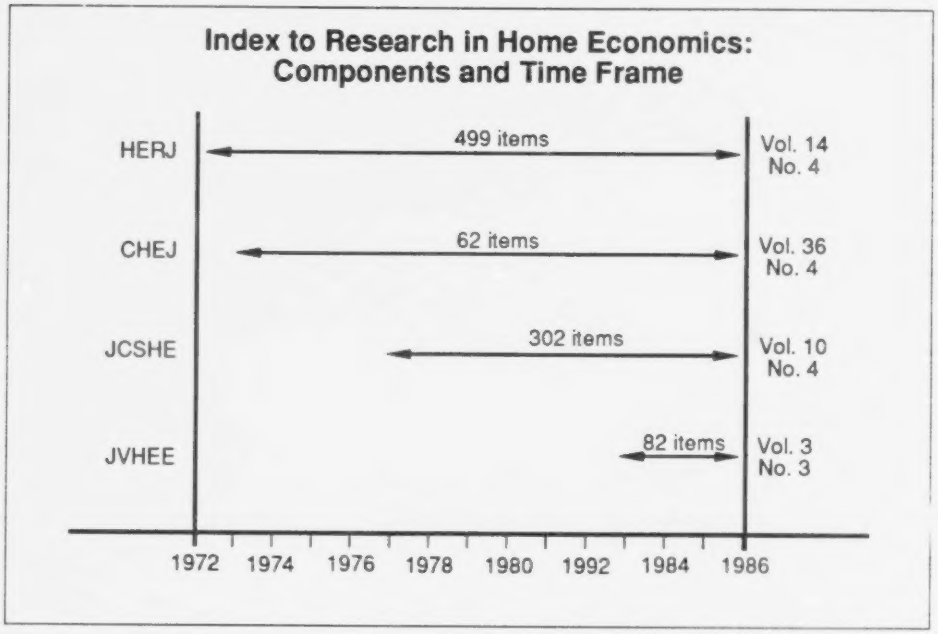
Organization

The Index is made up of four parts – a subject index, an author/title index, a keyword-in-title index, and a complete bibliography for four English language journals containing research in home economics. The four journals covered are: the *Canadian Home Economics Journal*, the *Home Economics Research Journal* (U.S.A.), the *Journal of Consumer Studies and Home Economics* (U.K.) and the *Journal of Vocational Home Economics Education* (U.S.A.).



Note: With the exception of CHEJ, all volumes begin with Vol. 1, No. 1. For CHEJ, the refereed section began with Vol. 23, No.3.

The first part is the Subject Index which consists of 12 main categories and 56 subcategories. The other subindexes are an Author/Title Index, and a Keyword-in-Title Index.

Entries

Each entry in the Complete Bibliography has a unique three-digit number to its left. That number is used to locate bibliographic information for articles listed in the Subject, Author/Title and Keyword-in-Title Indexes. Once you have identified a relevant article through the use of one of the three indexes, use the number beside the index entry to locate the full bibliographic information in the Complete Bibliography section.

For example, if you selected from the Subject Index the article on coordinators of high school home economics programs entitled "Professional Commitment and Change Orientation of Coordinators of Home Economics in High Schools of Victoria, Australia" and numbered 318, find 318 in the Complete Bibliography to obtain the authors' names and publication information. The number associated with each item in the Complete Bibliography is sequentially assigned according to the chronological order within journal volumes. The sequence of the four journals is alphabetical according to journal title.

The items in the Complete Bibliography are arranged first in alphabetical order according to journal names and second in chronological sequence within the journals. The entry numbers which correspond to the specific journals are:

1 to 62	*Canadian Home Economics Journal*
63 to 561	*Home Economics Research Journal*
562 to 863	*Journal of Consumer Studies and Home Economics*
864 to 945	*Journal of Vocational Home Economics Education*

If you selected the article by using the Author/Title Index, again you would refer to the Complete Bibliography for details of the location of the article. The same procedure would also be used when identifying relevant titles in the Keyword-in-Title Index.

Subject Index

ART AND DESIGN

62 Consumer preferences for aesthetic and performance attributes of apparel: A generic approach

181 Clothing and aesthetics: Perception of form

254 Body proportions of fashion illustrations, 1840–1940, compared with the Greek ideal of female beauty

482 Aesthetic and utilitarian qualities of clothing: Use of a multidimensional clothing value model

501 Colors compared: Matisse and Picasso with Chanel and Vionnet

505 Pattern as a design aspect: Visual perception of its properties

530 Women's motivations for participation in arts/design programs: Differences and effects

573 A report on the integration of a unit of design studies into advanced courses in home economics

789 Aesthetic rules in women's apparel: Empirical fact or fantasy

CLOTHING AND TEXTILES

Clothing Construction and Design

4 Seaming of lightweight knits

21 Identifying predictors of competency in clothing construction

44 Clothing fasteners: Ease of manipulation and preference among arthritic women

55 Factors influencing time allocation to home sewing

61 Skin boot production in Arctic Bay

182 Flammability of children's sleepwear: Evaluation of selected construction features

234 Weight loss and the resulting fit and size change of ready-to-wear for American women

277 Interactive effects of achievement anxiety, academic achievement, and instructional mode on performance and course attitudes

337 Panty design alternatives for women and girls with physical disabilities

338 Development and evaluation of individualized clothing construction modules

370 Pressure analysis as a design research technique for increasing the comfort of nursing brassieres

440 Pants alteration by graphic somatometry techniques

495 Diffusion of information about clothing to orthopedically disabled adults

501 Colors compared: Matisse and Picasso with Chanel and Vionnet

511 Appearance performance of fusible interfacing fabrics attached to home sewn cotton blouses

512 Insulation characteristics of outdoor garments and fabric systems

529 Teaching sewing machine tension concepts to blind and sighted students

548 Pesticide deposition patterns on garments during air blast field spraying

568 Hygiene and clothing problems for elderly people - Areas in need of technological development

582 The rapid teaching of sewing machine skills. I. A report on an intensive course designed to teach the rapid development of skills in the utilization of the domestic sewing machine

583 The rapid teaching of sewing machine skills. II. A preliminary study of the effectiveness of an intensive course on the use of a domestic sewing machine

629 Textile flammability and its influence on product design

728 Implementing a professional on-campus work experience for clothing and textiles students

754 Effect of fibre content and method of application of selected interfacings on performance of garments after repeated laundering

789 Aesthetic rules in women's apparel: Empirical fact or fantasy

Subject Index

CLOTHING AND TEXTILES

812 Product knowledge of fabric sales personnel: A comparison of three measurement methods

828 Determination of appropriate content for a clothing and textiles specialized course

845 Consumers' and retailers' practices and attitudes towards energy-efficient clothing

847 Computer-aided pattern making

862 Elderly women's clothing: Acquisition, fit and alterations of ready-to-wear garments

863 Clothing for the elderly at home and in nursing homes

944 Does the teaching of home economics skills have an economic payoff? The case of clothing construction

Clothing for Special Needs

44 Clothing fasteners: Ease of manipulation and preference among arthritic women

176 The design of protective equipment for ice hockey

301 Handicap: Common physical limitations and clothing-related needs

337 Panty design alternatives for women and girls with physical disabilities

568 Hygiene and clothing problems for elderly people - Areas in need of technological development

862 Elderly women's clothing: Acquisition, fit and alterations of ready-to-wear garments

863 Clothing for the elderly at home and in nursing homes

Historical and Cultural Aspects

7 History of embroidery: Contemporary purpose

54 Textile crafts of French Acadians of Louisiana

61 Skin boot production in Arctic Bay

156 Western dress styles adopted by Korean women

211 Aesthetic and structural characteristics of selected woven silks with emphasis on Dutch silks of the seventeenth century

239 The seriation of fashion

254 Body proportions of fashion illustrations, 1840–1940, compared with the Greek ideal of female beauty

255 Relationship between traditionalism of dress and social values of Ghanaian women

258 Changing function of symbolism in design of Korean silk textiles

286 Home economists as cross-cultural researchers: A field study of Ghanaian clothing selection

287 Analysis of historic and contemporary dress: An African example

300 Haute couture: A 25-year perspective of fashion influences, 1900–1925

316 Adult costume in Iowa towns, 1870–1880

365 Fashion leadership: A two-culture study — Part 1: Fashion leadership among Korean college women

366 Fashion leadership: A two-culture study — Part 2: Comparison of Korean and American fashion leaders

396 Navaho rugs: Evolution of the Ganado style 1890–1920

416 Clothing problems as perceived by Mexican American migrant women

417 Japanese textiles as described in the literature of Japan - 552 A.D. to 1185 A.D.

439 Textile and apparel resources in the 19th century south: Columbus, Georgia 1850–1891

501 Colors compared: Matisse and Picasso with Chanel and Vionnet

702 Indigo dyeing: Past and present

743 Clothing practices of Korean female immigrants in Chicago

Subject Index

CLOTHING AND TEXTILES

Labelling, Standard Sizing and Textile Standards

574 Size labelling of footwear

580 Flammability of textiles. I. New BSI test methods and ISO work

581 Flammability of textiles. II. Legislative implications of the new BSI test methods

617 Clothes-care symbols: Are they understood?

624 Developments in size labelling of women's garments

625 Textile care labelling

658 An exploratory cost-benefit study of a British standard for upholstered furniture fabric

759 Consumer awareness and acceptance of flame retardant textile products and flammability legislation

Laundering

114 Survival and redeposition of fungi during laundering

171 Laundering practices and results of homemakers using coin-operated laundries

312 Fabric whiteness as affected by selected laundry treatments and environmental factors

484 Line-dried vs. machine-dried fabrics: Comparison of appearance, hand, and consumer acceptance

644 Energy conservation in textile drying by selection of rinse temperature

660 Moisture studies in the domestic environment. 1. Dampness perception in laundered articles

688 The nature and action of fabric softeners

710 The effect of activation of the oxidation reaction of sodium perborate on the cleaning of textiles and the consumption of electric energy

740 The cost of washing clothes: Sources of variation

762 Home laundering Part I. An evaluation of the effectiveness of laundering soiled textiles

774 The effect of detergent type and laundering temperature on the soil removal and soil redeposition performance of cotton and p/c blends with and without durable press finish

779 Home laundering Part II. A laboratory evaluation of the washing performance of four detergent products at 40° C

795 Consumer attitudes towards level of soil removal and energy use in the laundering process

804 The effect of the oxidation reaction of sodium perborate on the damage to the cotton during washing

813 Relationship of wash/rinse water temperatures to soil removal

830 A study of the effects of repeated commercial launderings on the performance of 50/50 polyester/cotton momie cloth

848 The economic impact of a household product: The use of nitrilotriacetic acid

Production, Distribution, Retailing and Merchandising

61 Skin boot production in Arctic Bay

234 Weight loss and the resulting fit and size change of ready-to-wear for American women

253 Profiling consumer communication of complaints about clothing performance

367 Imported versus U.S.-produced apparel: Consumer views and buying patterns

453 Competition in the U.S. apparel import market

507 Responsibilities for energy conservation and environmental pollution: The consumer viewpoint

519 Price and quality differences for imported and domestic men's dress shirts

551 Fashion model's age as an influence on consumers' attitudes and purchase intent

Subject Index

CLOTHING AND TEXTILES

552 Imported versus domestic blouses: Women's preferences and purchase motives

558 Application of benefit segmentation to a generic product study in clothing and textiles

574 Size labelling of footwear

624 Developments in size labelling of women's garments

691 Fabric specialty stores: Consumer dissatisfaction with selected in-store attributes

721 Developmental patterns of Asia's apparel industry

727 Consumers' views on restricting imported apparel

728 Implementing a professional on-campus work experience for clothing and textiles students

773 Effect of textile quota restrictions on U.S. cotton textile imports between 1964 and 1973

812 Product knowledge of fabric sales personnel: A comparison of three measurement methods

815 Textile marketing: A status report

Social Science Aspects

10 Clothing values and their relation to personality and background in selected groups of Canadian university women

13 The relationship between specific clothing variables and self-concept of adult women

35 Clothing style as a determinant of social distance preference

59 Multiple-role dressing: Situational appropriateness

71 Adolescents' clothing conformity, awareness, and peer acceptance

81 Fashion preference: Measurement of change

105 Adolescent dress and social participation

CLOTHING AND TEXTILES

120 Clothing as a nonverbal communicator of social and political attitudes

141 Person and costume: Effects on the formation of first impressions

146 Lecture-discussion versus independent study in a college clothing course

181 Clothing and aesthetics: Perception of form

194 Clothing style differences: Their effect on the impression of sociability

195 Career appearance education for women who aspired to white-collar positions

227 Freedom in dress: A search for related factors

238 Attitudes toward clothing and self-concept of physically handicapped and able-bodied university men and women

244 Adolescent clothing and adjustment

276 Clothing and personal attractiveness of adolescents related to conformity, to clothing mode, peer acceptance, and leadership potential

284 Measuring visual response to clothing

285 Clothing symbolism and the changing role of nurses

289 Clothing preferences of male athletes: Actual and perceived

306 Perceived fashion risk and self-esteem of males and females

307 Clothing color preferences of adolescent females

315 Business dress for women corporate professionals

336 Impact of clothing on impressions of personal characteristics and writing ability

339 Clothing influence in adolescent leadership roles

340 Clothing satisfaction determinants

353 Attraction as a function of attitudes and dress

368 Career appearance: Perceptions of university students and recruiters who visit their campuses

Subject Index

369 Clothing and physical impairment: Joint effects on person perception

380 Public self-consciousness, social anxiety, and attitudes toward the use of clothing

381 Fashion preferences of males and females, risks perceived, temporal quality of styles

382 Measurement of individual differences in sensitivity to appearance

406 Attitudes toward clothing, body and self: A comparison of two groups

407 Freedom and conformity in dress: A two-dimensional approach

415 Clothing interest, self-actualization, and demographic variables

420 Use of perceptions of female dress as an indicator of role definition

421 Conformity and judgments of fashionability

422 Dress style variation related to perceived economic risk

431 Attraction toward a stranger as a linear function of similarity in dress

432 Appearance factors in cooperative teaching relationships

483 Depression: Relationships to clothing and appearance self-concept

490 Salience of physical appearance in impression formation

491 Sensitivity to the appearance of others and projection as factors in impression formation

492 Dress as an influence on the perceptions of management characteristics in women

493 Figure attractiveness: Male and female preferences for female figures

494 Relationship of fashion awareness and clothing economic practices

506 Male and female style preference and perceived fashion risk

536 Liturgical vestments and the priest role

539 Female appearance presentation: Gender differences in social attribution and situational choice

559 Freedom in dress: The legal view

709 An assessment of fashion awareness of females based on selected demographic factors

786 The clothing attitudes and activities of home economists employed in business

806 The physical attractiveness stereotype using dress as a facilitator

814 Effect of locus of control on student and recruiter responses to career appearance statements

Social Science Aspects combined with Consumer Studies

12 Clothing consumption in Canada

36 Minimum adequate clothing allowances for a Canadian prairie climate

43 The effect of question focus on consumers' attitudes

56 Economic analysis of household clothing expenditures

62 Consumer preferences for aesthetic and performance attributes of apparel: A generic approach

78 Clothing budgets for children from the USDA: Annual costs at three levels in four regions

139 Household textiles consumption by farm and city families: Assortment owned, annual expenditures, and sources

149 Consumer types based on evaluative criteria underlying clothing decisions

155 Clothing practices and preferences of blue-collar workers and their families

161 Consumer perceptions of textiles

203 Sexually attractive clothing: Attitudes and usage

270 Fashion preference: Drawings versus photographs

286 Home economists as cross-cultural researchers: A field study of Ghanaian clothing selection

288 Information seeking by fashion opinion leaders and followers

Subject Index

CLOTHING AND TEXTILES

363 Family clothing consumption: Comparison of two methods for collecting data

364 Clothing demand in the United States: A cross-sectional analysis

482 Aesthetic and utilitarian qualities of clothing: Use of a multidimensional clothing value model

503 Clothing purchase practices of adolescents

551 Fashion model's age as an influence on consumers' attitudes and purchase intent

558 Application of benefit segmentation to a generic product study in clothing and textiles

708 Clothing, ambient temperature and comfort - I

787 Consumer spending on designer jeans: A classical conditioning model

788 Dimensions of satisfaction with purchases of women's dresses: Before and after garment care

792 Clothing, ambient temperature and comfort - II

819 Consumer spending on designer jeans: An operant conditioning interpretation

845 Consumers' and retailers' practices and attitudes towards energy-efficient clothing

Social Science Aspects combined with Family Studies

6 Adjustment in pregnancy

36 Minimum adequate clothing allowances for a Canadian prairie climate

38 Preschoolers' beliefs regarding the obese individual

55 Factors influencing time allocation to home sewing

56 Economic analysis of household clothing expenditures

78 Clothing budgets for children from the USDA: Annual costs at three levels in four regions

213 Development of standard budgets for household textiles for farm and city families

217 Standard budgets for household textiles: Farm and city families at two income levels and three family sizes

363 Family clothing consumption: Comparison of two methods for collecting data

364 Clothing demand in the United States: A cross-sectional analysis

379 Young children's conception of physical attractiveness as evidenced in human figure drawings

485 A comparison of achievement scores in physically attractive and unattractive students

863 Clothing for the elderly at home and in nursing homes

Social Science Aspects combined with Other Aspects of Clothing and Textiles

55 Factors influencing time allocation to home sewing

61 Skin boot production in Arctic Bay

62 Consumer preferences for aesthetic and performance attributes of apparel: A generic approach

161 Consumer perceptions of textiles

234 Weight loss and the resulting fit and size change of ready-to-wear for American women

239 The seriation of fashion

255 Relationship between traditionalism of dress and social values of Ghanaian women

286 Home economists as cross-cultural researchers: A field study of Ghanaian clothing selection

287 Analysis of historic and contemporary dress: An African example

365 Fashion leadership: A two-culture study — Part 1: Fashion leadership among Korean college women

Subject Index

366 Fashion leadership: A two-culture study — Part 2: Comparison of Korean and American fashion leaders

Subject Index

666 A preliminary investigation of consumer preference for white fish of different species

674 The relationship between fast foods and convenience foods — Definitions and developments

677 The practical aspects of viscosity of carboxymethylcellulose in dietetic foods

692 Effect of thickening agents on the acceptability of artificially sweetened jellies

703 The diffusion of salt into potatoes during boiling and consumer preferences for various final salt concentrations

782 Sensory comparison of prepared frozen vegetables processed by microwave and conventional methods of blanching

836 Storage changes in biscuits

Foods combined with Consumer Studies

2 A study of retail egg quality

3 An evaluation of the use of recipe booklets to promote beef

5 Consumer opinions about pork

17 Effects of a metric educational program on homemakers' acceptance of the change to metric

20 A case for home canning education

26 Home canning of tomatoes

28 Sources of home-canning information: Their use and relationship to canning practices and spoilage experienced

32 Effect of oven preheating on energy consumption, eating quality and baking time of selected baked products

34 Comparison of energy consumption between the microwave oven and the conventional electric range

40 Convection ovens study: Time and energy consumption

72 Conventional and microwave heating of beef: Use of plastic wrap

87 Research model for process of choice in family food buying

88 Differences in reported food expenditures of sons and daughters resulting from choice of respondent

93 Sensory and histological characteristics of beef rib cuts heated at two rates to three end point temperatures

179 Teaching consumer selection of market quality beef by observable characteristics

185 Food shopping efficiency among the rural poor: An exploratory inquiry

186 Testing consumers for knowledge of beef concepts

187 Energy consumption and acceptability: Comparison of cooking methods and appliances for beef patties

214 Food consumption expenditures and education of the homemaker

225 Home-canned tomatoes: A comparison of the effects of varying time and temperature combinations during processing

279 Optimizing oven radiant energy use

400 Quality of green beans and energy required for high temperature processing

414 Household production of food: Expenditures, norms, and satisfaction

438 Quality of carrots dehydrated by three home methods

488 Cookery methods for vegetables: Influence on sensory quality, nutrient retention, and energy consumption

522 Safe food: Care labeling for perishable foods

523 Convenience and nonconvenience food use in single-person and multi-person households

525 Cost of preparing convenience and home-prepared foods with an electric and a microwave oven

575 Consumer aspect of beef marketing

592 Home food storage facilities and their use. II. The food in our refrigerators

593 Home food storage facilities and their use. III. How we package the foods in our refrigerator

639 A comparison of electricity consumption and time spent in cooking on a plate and in an oven

640 Saucepan lids: The key to low energy cooking

655 Marketing communication and food

656 Retail grocery price variations: A consideration of the structural and locational characteristics of stores

679 Feeding children at school. 1. The importance of questionnaire design and other factors in the study of school children's preferences

706 Factors affecting consumer selection and acceptability of beef in central Alberta

720 Consumer preferences regarding cooking methods and times for beef loin steaks in central Alberta

725 A review of factors influencing consumption, selection and acceptability of meat purchases

744 Influence of demographic factors on consumer purchasing patterns and preferences for ground beef

745 An investigation into the meat preferences of Malawians

748 Generic and manufacturers' brand grocery products: The issue of quality

765 Measurement of grocery prices: Some methodological considerations and empirical results

767 Modified starches in foods

794 Consumer preferences for fresh white fish species

801 Waterless cooking - Influence on energy consumption and nutrient retention

818 Degree-of-readiness classification system for foods: Development, testing and use

826 Food patterns of two-parent, two-child households of urban south Louisiana

827 Consumer opinions and practices related to food additives in the purchase situation

844 Food legislation in Britain: General principles and the evolution of the system

856 The use of solar energy for cooking in developing countries

861 Consumer use patterns for fresh and processed vegetable products

Foods combined with Equipment

34 Comparison of energy consumption between the microwave oven and the conventional electric range

40 Convection ovens study: Time and energy consumption

72 Conventional and microwave heating of beef: Use of plastic wrap

187 Energy consumption and acceptability: Comparison of cooking methods and appliances for beef patties

226 Sensory qualities, cooking losses, shear values, and B-vitamins of beef roasts cooked by slow-heat

279 Optimizing oven radiant energy use

385 Home dehydrators for food preservation

401 Microwave blanching of vegetables for frozen storage

438 Quality of carrots dehydrated by three home methods

524 Total and active time required to prepare convenience and home-prepared foods with an electric range and a microwave oven

525 Cost of preparing convenience and home-prepared foods with an electric and a microwave oven

545 Microwave and conventional heating effects on sensory quality and thiamin content of flounder and haddock fillets

555 Effects of radiant heat transfer: Cake baking in a conventional electric residential oven

567 Home food storage facilities and their use: I. Domestic refrigerators 1976

Subject Index

606 The microbiological safety of slow cooking in electric casseroles

639 A comparison of electricity consumption and time spent in cooking on a plate and in an oven

944 Does the teaching of home economics skills have an economic payoff? The case of clothing construction

Evaluation

30 Construction and evaluation of lesson-units on cereals and cereal products prepared for pupils of primary grades

46 Evaluation of the Nutrition at School Program: Teacher involvement

97 Educational participation and dietary changes of EFNEP homemakers in Louisiana

145 Preparing disadvantaged pupils for homemaker and wage-earner roles

209 Evaluation of homemaking and consumer education programs for low-income adults

875 Challenges in evaluating home economics educational programs for incarcerated populations

879 Integrating inquiry approaches for curriculum evaluation: A home economics application

887 What questions direct evaluation of consumer and homemaking programs and how do such questions relate to criteria used in making evaluative judgments?

888 Criteria used to evaluate consumer and homemaking programs

889 What are alternative criteria for judging consumer homemaking programs?

890 How can we operationalize criteria for program evaluation?

893 Effectiveness of occupational home economics programs as measured by career maturity

902 Evaluation of parent education classes in an adult consumer and homemaking program

903 Experimental design and evaluation of parent education

920 Consumer education: Effects of the type of consumer and homemaking programs in Mississippi

923 Handicapped students in home economics: Status of support services in mainstream classes

924 Development of a cognitive objective-based testing system for family relations

Impact, Profiles, and Public Opinion

906 Legislators' perceptions of consumer and homemaking programs' contributions in public education

907 Presenting a case for home economics

908 National data sets: Their use in home economics education

909 High School and Beyond: A national data set useful to home economics educators

910 Use of the High School and Beyond data set to describe occupational home economics students

911 Home economics students in the class of 1972

912 Attitudes, expectations and knowledge: What parents say about vocational consumer and homemaking programs

HOME ENVIRONMENT AND EQUIPMENT

Environmental and Interior Design

250 Westernized home life style in Japan

302 Loglinear models for analyzing housing sentiments of family members in a metropolitan and a non-metropolitan community

333 User effort related to apartment design

505 Pattern as a design aspect: Visual perception of its properties

528 Development and evaluation of interior design studio teaching modules

Subject Index

630 Effects of indoor climate on human comfort, performance and health in residential, commercial and light-industry buildings

648 Building related home accidents: A preliminary study

734 Dwelling layout and communication between rooms: Topological representation and a classification system

Equipment

34 Comparison of energy consumption between the microwave oven and the conventional electric range

40 Convection ovens study: Time and energy consumption

72 Conventional and microwave heating of beef: Use of plastic wrap

127 Service-life expectancy of household appliances: New estimates from USDA

132 Home appliance noise: Annoyance and speech interference

171 Laundering practices and results of homemakers using coin-operated laundries

172 Soil removal in automatic dishwashing

178 Heat distribution and heating efficiency in selected pans on conventional and glass/ceramic surfaced electric range units

187 Energy consumption and acceptability: Comparison of cooking methods and appliances for beef patties

205 Service life of appliances: Variations by selected characteristics of owner households

212 Energy consumption of a smooth-top and a conventional electric range in family meal preparation

226 Sensory qualities, cooking losses, shear values, and B-vitamins of beef roasts cooked by slow-heat

278 Electric energy used by major cooking appliances

279 Optimizing oven radiant energy use

327 The self-cleaning oven: A source of inside air contamination

385 Home dehydrators for food preservation

401 Microwave blanching of vegetables for frozen storage

418 Compatibility of solar home heating systems with values, felt needs, and past experiences of households

419 The computers are coming, the computers are coming: A study of human-computer social interaction

425 Husband-wife differences in coping with product malfunctions

438 Quality of carrots dehydrated by three home methods

456 Household equipment research: Past accomplishments, challenges for the future

489 Use of four potentially energy-saving electric cooking appliances in households

498 Portable electric appliance usage by households

510 Electric bedding use in southwestern Virginia: Energy, comfort, safety, and the consumer

524 Total and active time required to prepare convenience and home-prepared foods with an electric range and a microwave oven

525 Cost of preparing convenience and home-prepared foods with an electric and a microwave oven

545 Microwave and conventional heating effects on sensory quality and thiamin content of flounder and haddock fillets

554 Appliance ownership and household work time

555 Effects of radiant heat transfer: Cake baking in a conventional electric residential oven

567 Home food storage facilities and their use: I. Domestic refrigerators 1976

570 The house that NBS built

Subject Index

606 The microbiological safety of slow cooking in electric casseroles

607 Practical use of energy in the home

638 Carbon monoxide - A domestic pollutant

639 A comparison of electricity consumption and time spent in cooking on a plate and in an oven

640 Saucepan lids: The key to low energy cooking

649 Technical development of household appliances — For the benefit of consumers or producers? A case study of the use of electric ranges and sewing machines

660 Moisture studies in the domestic environment. 1. Dampness perception in laundered articles

675 Blanching of potatoes by microwave energy

680 Moulds in the home

712 Residential electric appliances: Determinants of ownership

730 Energy considerations when cooking with saucepans

740 The cost of washing clothes: Sources of variation

749 A comparison of the efficiency of manual and automatic dishwashing for the removal of bacteria from domestic crockery

757 Pectin methylesterase activity and the texture of carrot slices cooked in an electric casserole

801 Waterless cooking - Influence on energy consumption and nutrient retention

820 Dispersed alarm systems - A review

839 Appropriate household technology: Charcoal stoves

Furnishings

42 Use of information sources in the purchase of home furnishing textile products

117 Determining consumer preference for furniture product characteristics

215 Designing semantic differential scales for a universe of the near environment - Chairs

250 Westernized home life style in Japan

305 Typical chairs 1949–1968: An analysis of style and evolution

334 Liking and disliking household objects: An empirical study of value

395 Window shades in energy conservation

510 Electric bedding use in southwestern Virginia: Energy, comfort, safety, and the consumer

629 Textile flammability and its influence on product design

658 An exploratory cost-benefit study of a British standard for upholstered furniture fabric

687 The thermal performance of a continental quilt

858 Care labelling for upholstered furniture: Consumers' expressed needs and preferences

Housing

31 Beliefs, awareness and non-structural energy conservation practices of public housing tenants in Winnipeg

41 Factors in consideration of moving by older rural men

90 Housing aspirations of southern Appalachian families

111 Housing decisions in selecting a residence in a planned townhouse development

113 A technique for identifying values as behavioral potentials in making consumer housing decisions

122 Home maintenance and improvement behavior of owners

Subject Index

130 Apartment environments and socialization of young children

183 Consumer preferences and selected socioeconomic variables related to physical adequacy of housing

184 Housing values, aspirations, and satisfactions as indicators of housing needs

190 Nineteenth century builder's guides: Influence on Mississippi architecture

191 Quality of life from the perspective of the elderly

249 Housing satisfaction - The concept and evidence from home purchase behavior

266 Adolescent use of selected areas in the parental dwelling

267 Smallest space analysis: A method for relating empirical observation of use of space to housing design

302 Loglinear models for analyzing housing sentiments of family members in a metropolitan and a non-metropolitan community

333 User effort related to apartment design

361 Factors underlying consumer difficulties with the homebuying process

418 Compatibility of solar home heating systems with values, felt needs, and past experiences of households

457 Housing research in home economics: 1959–1982

508 Housing conditions and satisfactions of central Appalachian coal miners

516 Satisfaction with housing and quality of life

535 Home builders' evaluation of acceptability of solar and earth-sheltered housing designs

550 Development of scales to assess homeownership consumption and investment attitudes

570 The house that NBS built

627 Access, allocation and transfers in council housing: The National Consumer Council's response to the Department of the Environment Consultation Paper

645 Moisture measurements of everyday materials

648 Building related home accidents: A preliminary study

672 Minimizing total cost of apparel, housing and heating in maintaining thermal comfort indoors

680 Moulds in the home

694 Housing defects in newly purchased homes: Implications for family resource management

734 Dwelling layout and communication between rooms: Topological representation and a classification system

793 Purpose-built retirement housing for sale

802 Market values estimates of quantitative and qualitative attributes of houses

Noise, Comfort, and Home Safety

132 Home appliance noise: Annoyance and speech interference

327 The self-cleaning oven: A source of inside air contamination

510 Electric bedding use in southwestern Virginia: Energy, comfort, safety, and the consumer

629 Textile flammability and its influence on product design

630 Effects of indoor climate on human comfort, performance and health in residential, commercial and light-industry buildings

638 Carbon monoxide - A domestic pollutant

648 Building related home accidents: A preliminary study

650 Community noise - How much of a problem?

669 Thermal comfort in the home

672 Minimizing total cost of apparel, housing and heating in maintaining thermal comfort indoors

684 Some recent research into home heating

708 Clothing, ambient temperature and comfort - I

820 Dispersed alarm systems - A review

INTERNATIONAL COOPERATION, GLOBAL CONCERNS, AND THIRD WORLD DEVELOPMENT

466 University home economics programs in the United States: A survey of international involvement

689 International reciprocity in home economics

717 Cooperatives: Particularly their relevance to women in developing countries

721 Developmental patterns of Asia's apparel industry

738 Refugeeism and the family: A survey of related literature

839 Appropriate household technology: Charcoal stoves

850 Research on rural resource management: A Third World perspective

856 The use of solar energy for cooking in developing countries

RESEARCH ISSUES

Dissemination

470 Dissemination of information from home economics research

868 Computer searching the field of home economics

Facilitation

69 Symposium: Actualizing our research potential in home economics.

468 Critical needs for home economics research

472 Research process and achievement: Roles of administrators and researchers in the success of home economics research

473 Perceived needs of home economics faculty regarding the acquisition and management of sponsored research funding

474 The role of cooperative regional research in home economics

475 Home economics research: A macro view

476 The role of theory in research: Implications for home economics

480 Family research priority issue: Support

850 Research on rural resource management: A Third World perspective

Instrument Development

43 The effect of question focus on consumers' attitudes

67 Organizational styles of homemakers: A factor analytic approach

86 Moderator effects on attitude scale construction

95 Measuring the connotative meanings of foods

98 The Vocational Commitment Index

106 Children's preferences for clothing and hair styles

108 A reporting system for nutrient adequacy

113 A technique for identifying values as behavioral potentials in making consumer housing decisions

117 Determining consumer preference for furniture product characteristics

131 Identifying food-related values of low-income mothers

135 Secondary workers' earnings and their impact on family income adequacy

142 Construct validity of Creekmore's Clothing Questionnaire

143 Reliability of value orientation scales

206 Morphostatic and morphogenic planning behavior in families: Development of a measurement instrument

215 Designing semantic differential scales for a universe of the near environment - Chairs

245 Visual recall of dress design determined by perceptual style

290 Teaching performance in home economics

297 A preschool teacher competency rating scale

388 A method for developing a nutrient guide

404 Lifestyle alternatives: Development and evaluation of an attitude scale

543 Perceived adequacy of resources: Development of a scale

550 Development of scales to assess homeownership consumption and investment attitudes

679 Feeding children at school. 1. The importance of questionnaire design and other factors in the study of school children's preferences

821 Measuring changes in family energy management: Consumption or efficiency

884 Sexuality inventories for secondary home economics teachers

887 What questions direct evaluation of consumer and homemaking programs and how do such questions relate to criteria used in making evaluative judgments?

934 The home economics preprofessional performance evaluation (HEPPE)

Listing of Theses and Dissertations

1 Refereed section: Abstracts of theses/dissertations completed at Canadian universities

52 Graduate research in Canadian universities

58 Graduate research in Canadian universities

76 Titles of doctoral dissertations in home economics, 1971

101 Titles of doctoral dissertations in home economics, 1972

126 Titles of doctoral dissertations in home economics, 1973

148 Titles of doctoral dissertations in home economics, 1974

173 Titles of doctoral dissertations in home economics, 1975

428 Listing of theses and dissertations in home economics, 1982

521 Theses and dissertations completed in home economics: 1983 and 1984

561 Theses and dissertations completed in home economics, 1985

Research Methodology

87 Research model for process of choice in family food buying

88 Differences in reported food expenditures of sons and daughters resulting from choice of respondent

113 A technique for identifying values as behavioral potentials in making consumer housing decisions

150 Specimen preparation of raw and cooked carrot phloem and xylem for the scanning electron microscope

154 Scanning electron microscope studies on carrots: Effects on the xylem and phloem

158 Nutrition camp - A method for human nutrition research

169 Computer-based simulation for observing child behavior

189 Morphological comparison of two varieties of carrots during growth and storage: Scanning electron microscopy

239 The seriation of fashion

264 Differentiation of classroom climate among home economics teachers

270 Fashion preference: Drawings versus photographs

293 Electrophotography for recording bread texture

352 Relating fashion change to social change: A methodological approach

Subject Index

363 Family clothing consumption: Comparison of two methods for collecting data

370 Pressure analysis as a design research technique for increasing the comfort of nursing brassieres

442 Repeated measure design: A time use application

462 Use of the ethnographic approach as interpretive science within the field of home economics: Textiles and clothing as an example

477 Historical research in home economics: A model for implementation

531 Critical approach to family research: An illustration

538 Methodological note - Estimating the value of home work time: The impact of income taxes

550 Development of scales to assess home-ownership consumption and investment attitudes

558 Application of benefit segmentation to a generic product study in clothing and textiles

724 Action in home economics

763 Conditional demand functions, separability, and the length of run: Some notes for the applied researcher of household behaviour

765 Measurement of grocery prices: Some methodological considerations and empirical results

812 Product knowledge of fabric sales personnel: A comparison of three measurement methods

870 Content analysis: A tool for home economics researchers in uncovering subtle messages from contemporary life

890 How can we operationalize criteria for program evaluation?

903 Experimental design and evaluation of parent education

908 National data sets: Their use in home economics education

909 High School and Beyond: A national data set useful to home economics educators

910 Use of the High School and Beyond data set to describe occupational home economics students

911 Home economics students in the class of 1972

925 Alternative frameworks for research in the field of home economics

926 A technical approach: Predicting the rationality and deliberateness of students' self-evaluations from their levels of conceptual development

927 A hermeneutic approach: Reflecting on the meaning of curriculum through interpretation of student-teaching experiences in home economics

928 Critical science as a mode of inquiry: A critical study of educational evaluation theory and practice

929 Teaching with a critical science perspective

930 A researcher's intellectual orientation: A case study

Reviews of Research and Status Reports

16 The process of aging

47 Canadian family time use data: Current status and future prospects

51 Nutrition education in Canada: Progress and challenges

69 Symposium: Actualizing our research potential in home economics.

89 Home economics research supported by SAES-OCI funds, 1970–71

104 Fabric flammability: Needs for research

118 Pre-Engel studies and the work of Engel: The origins of consumption research

160 Home economics research personnel in land-grant universities

372 Home economics research activities in colleges and universities not associated with the land-grant system
